

Adding New PSE on PSCS

Date Created:	July 12, 2019	
Last Updated:	Last Updated: September 23, 2021	

Background

PSCS may include a broad range of Government and Non-Government agencies, all of which contribute to public safety of Manitobans. In order to qualify for PSCS, each PSE must first meet the requirements set by Industry, Science and Economic Development (ISED) in SRSP-511.

- Category 1 users (police, fire, and emergency medical services) permitted to use the 700 MHz radio service on the PSCS System.
- Category 2 users (forestry, public works, public transit, hazardous material clean-up, border protection and other agencies contributing to public safety).
- Category 3 users (other government agencies and certain non-government agencies) may be permitted to access to the PSCS System during emergency situations where their access is controlled by a Category 1 user.

Purpose and Scope

To establish and implement a consistent process for adding a new user on PSCS. This process will validate additional users on PSCS.

Any organization that is not currently on the approved PSE list, will need approval from Manitoba.

Process Input

The process is prompted by a request from a new user requesting to be on PSCS.

Process Flow

- 1. Applicant contacts Manitoba or Bell to request access to PSCS network.
- 2. Manitoba or Bell provides customer the Manitoba New Application for Access to PSCS form (Appendix A)
- 3. Customer completes the form and sends it by email to Manitoba: PSCSsupport@gov.mb.ca.

- 4. Manitoba reviews application and if approved, sends the applicant a copy of PSCS Network Application and Billing Information form (Appendix B) and Manitoba's PSCS Services Offering and Participation Agreement for signature.
 - (If application is declined, Manitoba informs the applicant the reason for the decision.)
- 5. Manitoba receives a signed Participation Agreement and PSCS Network Application and Billing Information form, then informs Bell of an approved request by submitting the form to BMRadioCC@bell.ca. Form will include Manitoba's approval with approved category/tier and priority level specified in the comments section.
- 6. Bell creates the customer account in SBT and contacts the PSE for any radio requirements.

Appendix A

NEW APPLICATION FOR ACCESS TO PUBLIC SAFETY COMMUNICATIONS SERVICE (PSCS) NETWORK

Once form is complete, please email to PSCSsupport@aov.mb.ca
