## INTRODUCTION

---

The Manitoba Estimates of Expenditure for the Fiscal Year Ending March 31, 2001 detail the expenditure intentions of the government as presented in The 2000 Manitoba Budget. The estimates of expenditure detail the annual appropriations to be approved by the Legislative Assembly through an appropriation act. Also reported in the estimates of expenditure, as required by section 30 of The Financial Administration Act, are statutory appropriations that are not voted on by the Legislature. Estimates of revenue for the same period are detailed in a separate document, Manitoba Estimates of Revenue for the Fiscal Year Ending March 31, 2001.

In order to assist in the review of these estimates, the following explanatory notes are provided.

### **Categories of Expenditure**

The Estimates of Expenditure include two sections: Part A – Operating Expenditure and Part B – Capital Investment. Operating Expenditure relates to the annual cost of operating government programs and interest on public debt while Capital Investment relates to the cost of acquiring tangible capital assets according to the change in accounting policy implemented in 1999/2000. Last year, the Province of Manitoba implemented an accounting change where expenditures on tangible assets are amortized on an “expense” basis over the useful life of the asset. This accounting policy results in authority for capital investments being requested separately (Part B) with an annual amortization charge included in expenditure appropriations (Part A).

#### Part A – Operating Expenditure

This section of the Estimates of Expenditure includes four main categories as follows:

*Operating Expenditure* – expenditures related to the direct delivery of government programs and services, including salaries and general operating costs, grants to third parties and expenditures related to tax credit payments, pensions and other provisions.

*Capital Grants* – funds granted to third parties such as health authorities, schools and universities, for the construction of and improvement to capital assets owned by these third parties.

*Infrastructure* – expenditures for the acquisition or construction of physical assets that do not meet or are excluded from the established guidelines for capitalization and includes expenditures on highways, bridges, and sewer and water infrastructure.

*Amortization of Capital Assets* – annual provision for the cost of a capital asset that is used in the delivery of government programs. Tangible capital assets acquired in the past as well as those to be acquired in the 2000/01 fiscal year have an associated expense over the entire useful life of the asset according to pre-determined amortization rates. Recognizing amortization in this way allocates the cost of capital assets to the periods of service provided.

---

## INTRODUCTION

---

### Part B – Capital Investment

This section of the Estimates of Expenditure provides the authority for the annual purchase or acquisition of tangible capital assets which meet established guidelines for amortization. Tangible capital assets are those with a useful life extending beyond one year which are acquired, constructed or developed and held for use, not for resale. Tangible capital assets with a value less than the accepted capitalization limit will be expended in the year of acquisition. As previously indicated, the annual amortization cost is reflected in Part A – Operating Expenditure as part of the annual cost of delivery of government programs. Details on the asset classifications, estimates of useful life and amortization rates are provided in Appendix B on page 153.

The annual appropriation act provides authority for departmental expenditures including the annual amortization expense (Part A of the Estimates of Expenditure) as well as the annual authority for the capital investment contained in Part B of the Estimates of Expenditure. The authority raised for both Part A and Part B is annual authority and lapses at the end of the fiscal year.

### **Prior Year Estimates of Expenditure**

The estimates of expenditure for the previous year include both the estimates of expenditure and any supplementary estimates of expenditure that may have been approved by the Legislature by way of a supplementary appropriation act. There were no supplementary estimates in 1999/2000.

In order to make year over year comparisons meaningful, adjustments to the previous year's estimates figures may be necessary. These adjustments reflect organizational changes, as well as any other adjustments that may be required to provide comparability. Generally speaking, the total of the previous year's estimates of expenditure does not change as a result of these adjustments. For 2000/01, the most significant adjustments relate to the reorganization of departments implemented in October, 1999.

### **Additional Expenditure Authority**

Funds will be voted by the Legislature at the main appropriation level for both Part A and Part B by way of resolution numbers (abbreviated "Res. No." in the detailed estimates). Expenditure authority cannot be transferred between main appropriations except for transfers from appropriations listed under the service heading "Enabling Appropriations" (e.g. Canada-Manitoba Enabling Vote). If additional expenditure authority is required due to unforeseen circumstances, the government must introduce supplementary estimates of expenditure and a supplementary appropriation act when the House is sitting, or obtain authority through a special warrant if the House has recessed or adjourned for a period of time as specified in section 32 of The Financial Administration Act. Supplementary estimates of expenditure would form part of the total voted expenditure authority for that year as noted above. This same approval process applies to a main appropriation within Part B – Capital Investment.

---

## INTRODUCTION

---

### **Statutory Appropriations**

Statutory appropriations contain expenditure authority approved by the Legislature by way of acts other than an appropriation act. Statutory appropriations exist for indemnities and retirement provisions for members of the Legislative Assembly, for various allowances related to functions and special duties performed by members, and for public debt. An "S" in the "Res. No." column of the detailed estimates denotes a statutory appropriation. As noted in the introductory paragraph, this is included in the estimates of expenditure for information purposes only and does not form a part of the appropriation act.

### **Enabling Appropriations and Other Appropriations**

In addition to departments, separate "service headings" exist to provide expenditure authority for programs that are delivered by a number of departments, where it is desirable to know the total amount allocated to the program, or where the allocation to various departments is not known at the time of printing the estimates. In some cases funding is allocated, as required, from the appropriation to departments by the Minister of Finance under authority granted by section 33 of The Financial Administration Act (Enabling Appropriations). In other situations, departments are granted authority to charge approved expenditures directly to the service heading. Several of these programs are included under the service heading entitled "Other Appropriations".

### **Recoveries**

Over the past several years, the government has been pursuing a policy of better identifying the total costs of operating the various programs throughout government through the allocation of overhead costs to programs. Cost recoveries have been introduced for insurance, accommodations, grants in lieu of taxes, air services and certain employee benefits. Cost recoveries are generally noted in a separate sub-appropriation called "Less: Recoverable from other appropriations". This designates that part or all of the costs of this program are recovered from other programs by charging appropriations either in that department or other departments. Recoveries for services provided to programs not within the consolidated government entity are deposited to revenue.

### **Special Operating Agencies**

Special operating agencies (SOAs) are service operations which are more directly responsible for their operating results and are granted increased management flexibility to reach new levels of performance. These agencies can be direct public services, internal services to government, science and technology services, or regulatory and enforcement programs. Special operating agencies are designated by regulation and operate under a charter approved by the Lieutenant Governor in Council. Funding for special operating agencies is normally not required in the annual estimates of expenditure as they are generally self-financing through their various fees and rates. However, each special operating agency is referenced in the estimates of the department responsible and a summary listing of special operating agencies is provided in Appendix A on page 149.

### **Estimates Supplements**

Additional detail on estimates of expenditure for individual departments is available in estimates supplements produced by each department and tabled in the House.

9.4	4.	CHILD AND FAMILY SERVICES .....	<b>226,344.5</b>	<u>205,462.3</u>
		Provides central program management for child and family services programs.		
		<i>Strategic Initiatives, Co-ordination and Support:</i> Provides the co-management of the Division's strategic initiatives with the program branches, ensures interdepartmental, extra-departmental and inter-sectoral cooperation and collaboration, and is responsible for divisional finance, administrative, and legislative services.		
		<i>Child, Family and Community Development:</i> Performs the lead responsibility for the co-ordination of children's developmental programs, including the Healthy Child Initiative, as follows:		
		Children's Special Services - Provides program and administrative direction and support for services to children with physical and/or mental disabilities.		
		Child Day Care - Licenses and provides program and financial support to child care facilities and subsidies on behalf of eligible families.		
		<i>Protection and Support Services:</i> Provides the program management and co-ordination among the Division's core protection, emergency, crisis and related support services for children and families within three main programs, as follows:		
		Child Protection and Support Services - Provides program and administrative direction and support for services to children in care, child protection services to communities and families which are mandated under The Child and Family Services Act and are delivered by child and family services agencies and regional offices, and for specialized services offered by other agencies.		
		Family Conciliation - Provides social service support to Court of Queen's Bench Family Division through information/referral, mediation, conciliation counselling and court-ordered assessments.		
		Family Violence Prevention - Provides funding, program and administrative direction to a wide continuum of community-based agencies which offer services to abused women and their children, and to men with abusive behaviours.

		<i>Industry Development - Consulting Services:</i> Functions as the government's primary liaison in providing development services to industry in the areas of marketing, investment, technology and infrastructure to support economic growth and stimulate employment. Activities are strategically planned to focus primarily on key sectors.		
		<i>Industry Development - Financial Services:</i> Provides or facilitates businesses' access to capital to spur the establishment and expansion of enterprises and provides assistance and support for mineral exploration and development projects to improve the economic and environmental status of Manitoba.		
		<i>Manitoba Trade and Investment Marketing:</i> Provides business with assistance to identify and take advantage of opportunities in export markets, and promotes Manitoba investment opportunities abroad to increase exports, inward investment and employment. Develops marketing strategies and promotes investment and other economic development related to the mining industry in Manitoba.		
		<i>Small Business and Entrepreneurial Development:</i> Co-ordinates and delivers a range of services for the enhancement and growth of Manitoba's entrepreneurial and small business community and provides support to groups and communities seeking to incorporate as cooperative enterprises.		
		<i>Access 204 Manitoba:</i> Facilitates the growth and transformation of call centres due to e-commerce industry in terms of infrastructure, capital and human resource requirements.		
		<i>Industrial Technology Centre:</i> Facilitates economic development in Manitoba through the provision of industrial technology services.

**APPENDIX A**

**SPECIAL OPERATING AGENCIES**

---

As noted on page 7 of the introduction, special operating agencies are service operations which are more directly responsible for their operating results and are granted increased management flexibility to reach new levels of performance. Funding for special operating agencies is normally not required in the annual estimates of expenditure as they are generally self-financing through their various fees and rates.

General information on special operating agencies can be found in the annual report for the Special Operating Agencies Financing Authority.

**APPENDIX B**  
**ACCOUNTING POLICY FOR CAPITAL EXPENDITURES**

## APPENDIX B ACCOUNTING POLICY FOR CAPITAL EXPENDITURES

The province implemented a change in accounting policy for tangible capital assets in 1999/2000 based on standards issued by the Canadian Institute of Chartered Accountants. These standards require that expenditures on tangible assets be amortized over the useful life of the asset. Recognizing amortization in this way allocates the cost of capital assets to the periods of service provided and amortization is recorded as an expense in the statement of operations.

Tangible capital assets are those with a useful life extending beyond one year which are acquired, constructed or developed and held for use, not for resale. Tangible capital assets with a value less than the accepted capitalization limit will be expensed in the year of acquisition.

The expected useful life of an asset takes into consideration the passage of time, normal wear and tear and the effects of technological obsolescence. The province has adopted a standard useful life for each asset class that is expected to remain the same over time. The straight-line method of amortization used reflects a constant charge for the service as a function of time.

The following table summarizes the standard asset classes, capitalization limits and amortization rates related to this accounting policy.

Asset Class	Asset Description	Capitalization Limit (\$ dollars)	Useful Life (years)	Amortization Rate Straight-line (%)
1	LAND	n/a	n/a	n/a
2	BUILDINGS - bricks, mortar & steel	100,000	40	2.50
3	BUILDINGS - wood frame	100,000	25	4.00
4	VEHICLES	10,000	5	20.00
5	AIRCRAFT & VESSELS			
	- Aircraft Frames	10,000	24	4.17
	- Aircraft Motors	10,000	5	20.00
	- Vessels	10,000	24	4.17
6	MACHINERY & EQUIPMENT - other than for road construction and maintenance	10,000	10	10.00
7	MACHINERY & EQUIPMENT - road construction and maintenance	10,000	15	6.67
8	COMPUTER HARDWARE - mainframe and mini computers	50,000	10	10.00
9	COMPUTER HARDWARE - personal computers	10,000	4	25.00
10	COMPUTER - major application	500,000	15	6.67
11	COMPUTER SOFTWARE - other	10,000	4	25.00
12	FURNITURE	10,000	10	10.00
13	LEASEHOLD IMPROVEMENTS	100,000	over term of lease	

For example, for a piece of machinery used for road construction costing \$30,000, the estimated annual amortization would be calculated as follows:

$$\begin{array}{rcccl}
 \text{Historical Cost} & & \text{Useful Life} & & \text{Amortization} \\
 \hline
 \$30,000 & \div & 15 & = & \$2,000/\text{year}
 \end{array}$$
