

Critical Incidents Reported to Manitoba Health

Period: July 01, 2023 - September 30, 2023

Fiscal Year Occurred	Degree of Injury	Description
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention.
2023/24	Major	Incorrect procedure was completed, and a second procedure was required.
2023/24	Major	Incorrect device was used during procedure resulting in extension of hospital stay.
2023/24	Major	Client fall resulted in fracture.
2023/24	Major	Delays in communication of diagnostic imaging results resulted in a loss of opportunity for timely intervention.
2023/24	Major	A patient experienced skin tissue breakdown. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	Client experienced a fall resulting in fracture.
2023/24	Major	A patient inflicted serious self-harm which required an escalation of care.
2023/24	Major	A resident experienced a fall that resulted in a serious outcome.
2023/24	Major	A patient became unresponsive, requiring resuscitation and transfer to a higher level of care.
2023/24	Major	A patient had a fall that resulted in a serious outcome.
2023/24	Major	A patient experienced a change in health status requiring medical intervention after receiving a prescribed medication.
2023/24	Major	A resident experienced an unintended injury requiring intervention and a higher level of care.
2023/24	Major	A patient experienced a delay in transfer for required treatment.
2023/24	Major	Failure to escalate transfer of a critically ill client to more appropriate care facility.
2023/24	Death	There was a delay in recognition and response to a patient's acute medical condition.
2023/24	Major	A resident experienced an injury. Opportunities to mitigate the risk of injury were not fully realized.
2023/24	Major	A resident experienced a fall. Opportunities to mitigate the risk of injury were not fully realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention.
2023/24	Major	A client experienced skin tissue breakdown. Early opportunities to provide intervention were not consistently realized.
2023/24	Death	Client deterioration during procedure was not recognized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention.
2023/24	Death	A patient experienced an acute change in their medical condition. The opportunity for earlier recognition and intervention was not realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide interventions were not consistently realized.
2023/24	Major	Complication occurred during procedure related to equipment use, resulting in need for a second procedure.
2023/24	Major	Complication occurred during procedure related to equipment use, resulting in need for a second procedure.
2023/24	Major	A patient experienced an acute change in their medical condition. The opportunity for earlier consultation and treatment was not realized.
2023/24	Major	A patient experienced a delay in diagnosis and treatment of an acute medical condition requiring a transfer to a higher level of care.
2023/24	Major	A client experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	Upon retrospective analysis, an abnormality was noted on previous diagnostic imaging. Opportunities for earlier diagnosis and less invasive treatment were missed.
2023/24	Major	A patient experienced a complication of treatment requiring a higher level of care.
2023/24	Major	An opportunity for post procedure follow-up care was missed. The patient experienced serious harm.

Fiscal Year Occurred	Degree of Injury	Description
2023/24	Death	Postponement of an elective surgery resulted in a serious outcome.
2023/24	Death	A patient experienced a clinical deterioration following dislodgement of a medical device.
2023/24	Major	A patient experienced a procedural complication associated with a serious outcome requiring emergent intervention.
2023/24	Major	A resident experienced a change in their medical condition. The opportunity for earlier recognition and intervention was not realized.
2023/24	Major	A patient was admitted to hospital with a respiratory illness. Delay in response to clinical deterioration led to serious harm and the need for a higher level of care.
2023/24	Major	A patient required escalation of care due to an acute deterioration. Opportunities to expedite medical assessment and diagnostic investigations were not realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier assessment and intervention were not realized.
2023/24	Major	A patient experienced a fall that resulted in a serious outcome.
2023/24	Major	A patient required re-admission and escalation of care. Opportunities for earlier diagnosis and intervention during the initial hospital stay were not realized.
2023/24	Major	Appropriate process for complex case was not followed, negatively impacting treatment plan and leading to extension of hospital stay.
2023/24	Major	Inaccurate interpretation of diagnostic imaging resulted in a missed opportunity for non-surgical intervention.
2023/24	Major	There were missed opportunities to mitigate a patient's risk of developing a known post-operative complication. The patient required re-admission to hospital.
2023/24	Major	Treatment plan did not align with changes in client status resulting in an extension of hospital stay.
2023/24	Major	All opportunities to mitigate risks associated with a treatment were not realized. The patient experienced a serious outcome.
