## FOREWORD

The population data shown in this report are based on records of residents registered with Manitoba Health as at June 1, 2020.

Data for the regions include population of cities, towns, villages, rural municipalities, local government districts, and unorganized territories. It should be noted that villages and towns are separately identified if these are incorporated. If unincorporated, the population counts are included in the rural municipality in which these are located.

Population for small areas (for example, a rural town) can be biased because the mailing address may be reported as the place of residence. An individual residing outside the town, but having a mailing address there, may be counted as living within the town. This bias in the population figures is reduced as the catchment area increases. Thus, regional estimates are not significantly affected by the mis-classification bias. Fluctuations from year to year for these small areas might also be affected by changes to mail delivery locations assigned by Canada Post.

The type of place indicates First Nations, unorganized territory, and municipal status of incorporated places (city, town, village, rural municipality, and local government district). The following list indicates the abbreviations used for types of places:

FN	First Nation Band
LGD	Local Government District - a designated area having no local government; administered by the province through a resident administrator.
R.H.A.	Regional Health Authority
RM	Rural Municipality

## NOTES ON POPULATION REPORTING METHODOLOGY

Current-year and five-year populations for RHA Districts were tabulated using the RHA District definitions current as of June 1<sup>st</sup>, 2020.

As of the 2018 population reports, international students within Manitoba without Canadian residency are no longer included in this report's population. This change brings the populations in this report in alignment with changes in policy enacted in 2018 regarding health care coverage. Please note that this change means that the population data up to and including 2017, and population data from 2018 and beyond, are measuring populations which are not identically defined. In particular, this change results in significant decreases in measured populations for the ages and areas with a significant proportion of international students.

Canada Post has now implemented new postal codes specific to the community of Ste. Genevieve. Before this change, the residents of this community previously were part of Ste. Anne's Rural Route #2, and could not be distinguished for population purposes from the rest of the Manitoba residents on this Rural Route. Because residents of Ste. Genevieve could not be distinguished from the Manitoba residents on Rural Route #2, they were previously reported as part of the population of the RM of Ste. Anne; as of the 2018 population reports, they will more correctly be reported as part of the population of the RM of Tache.

Internal improvements affecting population reporting have enabled more appropriate identification of on-reserve residents of some First Nations communities, as of the 2018 population reports.

## **Part 1**

# **Manitoba Population Report – 2020**

## **Introduction and Overview**

## Population Changes

The purpose of this section is to highlight changes in the population of Manitoba. Changes are determined by comparing the registration file for the current year to that of the previous year. A file is created for additions (residents on the current file but not on the previous file) and one for deletions (residents on the previous file and not on the current file). After determining reason for coverage or cancellation, those coded as deaths, births and other<sup>(1)</sup> are separated, leaving only arrivals and departures. The deletions are subtracted from the additions with a resulting net migration.

Figures 1a, 1b, and 1c depict the actual number of residents cancelled from the registration system upon notification of death during the period June 1, 2019 to June 1, 2020. Figures 1b and 1c are female and male profiles.

Figures 2a, 2b, and 2c represent population migration. In-migration and out-migration with a resulting net migration trend line are depicted. Manitoba gained population through in-migration between June 1, 2019 and June 1, 2020. There were 26,164 in-migrants and 11,983 out-migrants resulting in a net in-migration of 14,181. Figures 2b and 2c are the female and male trends.

(1) Member of the Armed Forces, inmate of a penitentiary, or not located.
