

# Manitoba Take Home Naloxone Program

SAVING LIVES SINCE 2017

**Naloxone** is a medication that can temporarily reverse the effects of an opioid overdose or poisoning.

Take home naloxone kits are available for free to members of the public at risk for experiencing or witnessing an opioid toxicity.

The first and most important step in a suspected opioid overdose or poisoning is to **call 911**.

> **100,000**

kits distributed since 2017

**4 doses / kit = 400,000**

doses distributed since 2017

**278**

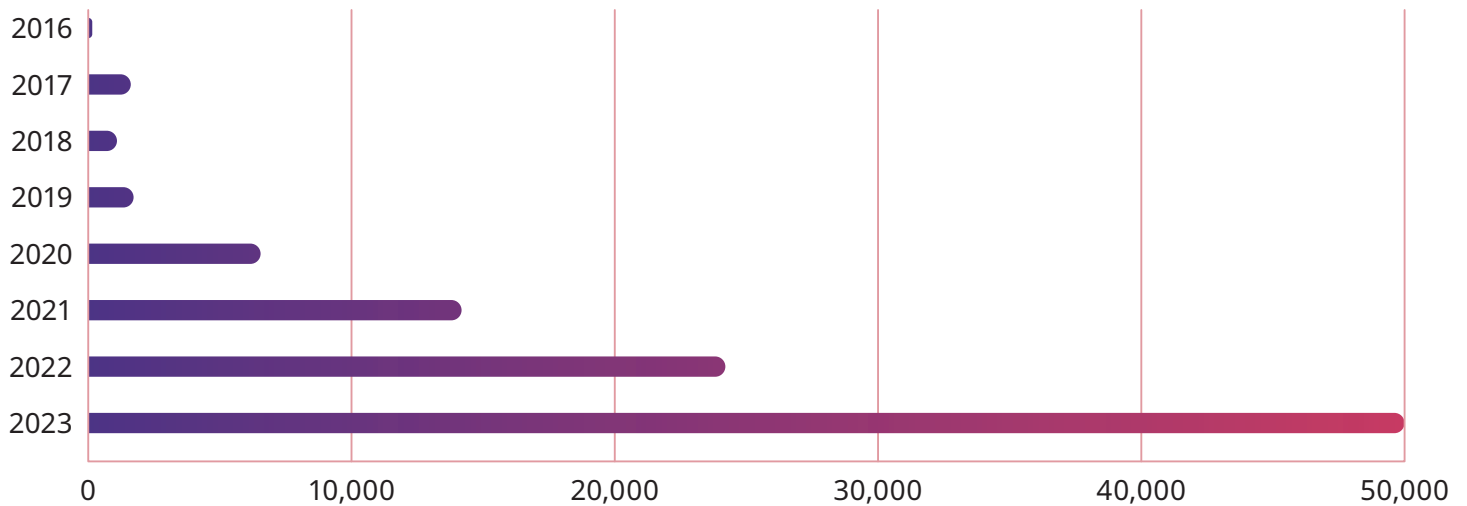

distribution sites

In 2023, Manitoba had an annual naloxone distribution rate of

**3,462 kits / 100,000 people**

## PROGRAM GROWTH

# kits distributed per year
