

**AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION  
UNDER THE CLEAN ENVIRONMENT ACT**

---

**RE: THE CLEAN ENVIRONMENT COMMISSION and the VILLAGE OF GLENBORO, Applicant,**

**WHEREAS** pursuant to the provisions of The Clean Environment Act, the Village of Glenboro filed a proposal in connection with the operation of an expanded and upgraded sewage lagoon system located in the NW 1/4 of Section 10, Township 7, Range 14 WPM in the Village of Glenboro, Manitoba, with percolation of treated wastewater into the soil from the secondary cell of the said system;

**AND WHEREAS** in the absence of limits, terms and conditions prescribed by a regulation under the said Act, the proposal was referred to The Clean Environment Commission to prescribe limits, terms and conditions;

**AND WHEREAS** after giving notice of the proposal, the Commission received a notices of representation and held a hearing in Glenboro on the 9th day of April, 1984;

**AND WHEREAS** the Commission issued Order No. 1023 on the 13th day of June, 1984 prescribing limits, terms and conditions and providing for a review by the Commission, following the submission of hydrogeological reports, on or about the 1st day of July, 1986;

**AND WHEREAS** after giving notice the Commission held a hearing in Glenboro on the 22nd day of July, 1986 and considered the matter on the 20th day of August, 1986;

**IT IS HEREBY ORDERED THAT ORDER NO. 1023 BE VARIED TO READ AS FOLLOWS:**

1. The Applicant shall construct, maintain and operate the said sewage lagoon system in such a manner as to minimize the release of offensive odours.
2. The Applicant shall not permit the organic loading on the primary cell of the said sewage lagoon system, in terms of five-day biochemical oxygen demand, to exceed 56 kilograms per hectare per day.

3. The Applicant shall not discharge effluent from the secondary cell of the said sewage lagoon system except by infiltration into the soil of the said secondary cell.
4. Until such time as the Applicant is notified by the Environmental Management Division that such reports are no longer necessary, the Applicant shall inform the said Division not less than 7 days in advance of any release of sewage effluent into the secondary cell of the said sewage lagoon system.
5. The Applicant shall, 14 days after every release of effluent from the primary cell to the infiltration cell of the said sewage lagoon system, sample the groundwater from the wells drilled in connection with the hydrogeological survey of the system, arrange for analysis of the samples for total coliform, faecal coliform, nitrite-nitrate, sodium and chloride in a manner satisfactory to the Environmental Management Division and submit the analysis data to the Division within 60 days of the day the samples were collected.
6. The Applicant shall terminate the use of the infiltration cell within one year of any occasion on which the total nitrate-nitrite nitrogen level in any monitoring well is found to equal or exceed 10 milligrams per litre expressed as N.
7. This order shall be reviewed by the Commission in accordance with the provisions of the said Act, about the 1st day of September, 1988.
8. Order No. 1023 as varied by the Commission is designated Order No. 1023VC.

Order No. 1023VC

Dated at the City of Winnipeg  
this 25th day of August, 1986.

  
\_\_\_\_\_  
Chairman,  
The Clean Environment Commission.
