Re: Former Springhill Farms Industrial Wastewater Treatment Facility Primary Cell Liner – Notice of Alteration

Dear Colleen Synchyshyn:

This is in response to a Notice of Alteration filed on behalf of R3 Innovations Inc. by Stantec Consulting Ltd., dated July 16, 2020. The alteration involves the installation of a high density polyethelene liner in the primary cell of the above facility, and associated sludge handling and cell remediation activities.

I concur that the environmental effects associated with the project are insignificant. Accordingly, implementation of the alteration is approved pursuant to Clause 14(2) of The Environment Act. The new liner must be inspected prior to covering and using it. To arrange this inspection or for any questions you may have concerning this approval, please contact Jennifer Winsor, Environmental Engineer, Environmental Approvals at Jennifer.Winsor@gov.mb.ca or 204-945-7012.

Sincerely,
