Dear Mr. Myrowich:

Re: ErosionControlBlanket.Com Inc – Notice of Alteration

Thank you for the Notice of Alteration dated May 22, 2015 submitted by Asmundsson Engineering on your behalf. The submission describes your intention to expand the fibre recovery system and increase the stenlog production capacity at your Riverton Erosion Control Blanket manufacturing facility. The Notice of Alteration will be considered in accordance with Section 14 of *The Environment Act*.

The proposed changes to the Development as Licensed are as follows:

1. Install a new waste fibre recovery system.
2. Increase the production capacity of stenlog.
3. Install a dust collection system to control fugitive dust emission.
4. Construction of waste fibre storage and handling system.

Based on the information provided, and after much consideration, I have determined that the potential environmental effects of the proposed changes to the facility are significant. Therefore, ErosionControlBlanket.com is required to submit an Environment Act Proposal (EAP) in accordance with section 10(1) of *The Environment Act*. Please refer our website at the following link for information to assist in preparation of a complete EAP.
