Dear Mr. Brazzale:

Re: Plasti-Fab Ltd. – Pentane Management Plan

Thank you for your letter dated October 31, 2016 and the additional information you provided on December 2 and 5, 2016 describing the pentane management plan for the above-noted licensed development. It is commendable that 60% of your current feedstock contains <5% pentane. You indicated that converting the whole process to manufacture products with feedstock <5% pentane would not be economically feasible. However, Plasti-Fab has identified the possibility to adjust the process to manufacture 85% of the product using feedstock with <5% pentane. Your request to manufacture 15% of the products using a feedstock with >5% pentane content has been reviewed and is approved to meet the requirement of Clause 11(b) of the licence.

If you require further information regarding this matter, please contact Eshetu Beshada at (204) 945-7023 or Eshetu.Beshada@gov.mb.ca.

Yours sincerely,

Tracey Braun, M.Sc.
Director
