Subject: Re: 5806.00 City of Selkirk Water Supply Wells EAP Review

Mr. Webb,

I reviewed the above noted EAP. Since the proposed work is an alteration to a raw water source for a public water system, the Owner will have to apply for and be issued a Permit to Construct or Alter a Public Water System from Office of Drinking Water before construction of the work begins.

Apart from this point, ODW has no other concerns with the EAP or proposed development respecting drinking water quality or safety.

If you have any questions, please call.

Regards,

James Stibbard P. Eng.

BW

Bruce,

The City of Selkirk applied to this section (WULS) for a Water Rights Licence. WULS issued the City with a Groundwater Exploration Permit to allow the City to explore for groundwater in their selected target area. One of the conditions of the Permit was that the City hire a consulting hydrogeologist and that an aquifer test be conducted by the consultant to evaluate both the sustainability of the any supply well completed for the project and to evaluate the degree of any third party impacts. The City has satisfied our requirements for a water rights licence which will be issued once the project has been built and commissioned.

Rob Matthews, Manager, WULS, CWS.

RE: City of Selkirk - Supplemental Groundwater Supply
Client File No. 5806.00

Dear Ms. Braun:

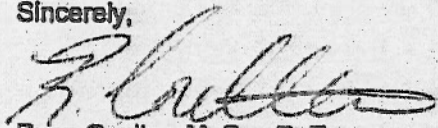

MIT has reviewed the proposal under the *Environment Act* noted above and MIT's Eastern Region has the following comments/concerns:

- The report was unclear about the proposed route of the waterline and the figure showing the proposed route options was not in colour making it impossible to see the proposed routes.
- An underground agreement will be required for any lines crossing or within the Provincial Road rights-of-way. The proponent should forward to MIT copies of plans and a letter requesting permission to place any lines, or structures within or crossing Department's right-of-way or Controlled Areas. The drawings should be submitted for review and approval a minimum of 6 weeks prior to the beginning of construction.
- If the proponent is proposing any access connections to any highways or any structures within the Controlled Areas then, under *The Highways and Transportation Act* permits from MIT are required for:
 - any new, modified or relocated access to a Provincial Road or Access Road;
 - any structures (including advertising signs, wells, septic fields, etc.) on, under or above the ground within the 38.1 meter (125 ft) Controlled Area adjacent to Provincial Roads;
 - discharging of water or other liquid materials into a ditch of a Limited Access Highway, Provincial Road or Access Road; and/or
 - placing any trees or plantings within 15.2 metres (50 feet) of the edge of right-of-way of a Limited Access Highway, Provincial Road or Access Road.

For clarifications on these comments, please contact Joelle Coulombe, Regional Planning Technologist, at (204) 346-6294 or at Joelle.Coulombe@gov.mb.ca.

Thank you very much for providing us the opportunity to review the proposal.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Couiter". The signature is fluid and cursive, with a long horizontal stroke at the end.

Hello Bruce

The proposed project is not a designated activity under the Regulations Designating Physical Activities (CEAA 2012), so the Agency will not be participating further in the review.

Thank you
