

## **SUMMARY OF COMMENTS/RECOMMENDATIONS**

**PROPONENT:** Walinga Inc.  
**PROPOSAL NAME:** Walinga – Metal fabrication Plant  
**CLASS OF DEVELOPMENT:** 2  
**TYPE OF DEVELOPMENT:** Manufacturing -  
**CLIENT FILE NO.:** 5841.00

### **OVERVIEW:**

Manitoba Sustainable Development received a Proposal on April 20, 2016 for the expansion and continued operation of the Development being a custom truck body and a pneumatic conveying system manufacturing facility at 70 3<sup>rd</sup> Ave NE in Carman, Manitoba. The facility engineer and manufacture bulk transportation equipment, pneumatic conveying system, blowers and air lock parts.

The Department, on June 23, 2016 placed copies of the Proposal in the Public Registries located at Legislative Library (200 Vaughan Street), the Winnipeg Millennium Public Library and online at <http://www.gov.mb.ca/conservation/eal/registries/5841walinga/index.html>. Notification of the Proposal was provided to the Technical Advisory Committee (TAC) members. A notice of the Environment Act proposal was placed in the Carman Valley Leader on June 23, 2016. The newspaper and TAC notifications invited responses until July 25, 2016.

## **COMMENTS FROM THE TECHNICAL ADVISORY COMMITTEE:**

### **Manitoba Sustainable Development –Environmental Compliance and Enforcement Branch**

The branch provided the following comments.

- A copy of all hazardous chemicals inventory at a location that can be accessed during an emergency.
- To maintain records of the type and quantity of hazardous waste generated, stored and disposed and should be available to an Environment Officer upon request.
- Emergency spill containment and clean-up equipment should be available in the facility where hazardous chemicals/waste are stored, handled, and/or transferred.
- Pollutant emission should be limited to comply with legislative requirements

#### **Disposition**

These comments have been forwarded to the proponent for consideration. In addition clauses 8, 9, 18 to 23, 25 and 26, 29 and 30, 31 and 32, and 36 to 38 of the draft Environment Act Licence address issues related to emission limits, emission monitoring, spill containment, hazardous waste handling and emergency responses.

#### **PUBLIC HEARING:**

A public hearing was not requested and is not recommended.

#### **CROWN-INDIGENOUS CONSULTATION:**

The Government of Manitoba recognizes that it has a duty to consult in a meaningful way with Indigenous communities when any proposed provincial law, regulation, decision or action may infringe upon or adversely affect the exercise of the Indigenous rights of that community.

The proposed expansion will be to an existing facility located in an industrial zoned area within the Town of Carman. As the operation is not expected to affect Indigenous rights, it is concluded that Crown-Indigenous consultation is not required for the project.

#### **RECOMMENDATION:**

The Proponent should be issued a Licence for the expansion and continued operation of a custom truck body and a pneumatic conveying system manufacturing facility in accordance with the specifications, terms and conditions of the attached draft Licence. Enforcement of the Licence should be assigned to the Environmental Compliance and Enforcement Branch of Manitoba Sustainable Development.
